Eldridge Firm To Build New Building

ELDRIDGE, Iowa — Construction of a new building to house the Eldridge Hardware and Immplement Co., and the razing of the present building occupied by the firm, have been announced by Mr. and Mrs. Robert Wiese, owners of the firm.

The new building will be built at the east edge of Eldridge adjoining the Boy-A-Loy drive-in restaurant. The present buildings occupied by the firm are on the east side of the main business district in Eldridge.

While plans have not been fully completed for the new building, Wiese said that it is expected to be completed and ready for occupancy by July 1.

Wiese also said that there was a possibility that a new United States Post office building will be built on the lots occupied by the present implement buildings.

The regional office of the United States Post office Department has taken an option on one of the lots, and announced that bids for a building will be called for within the next several weeks. The building will be built by a private contractor and leased to the postoffice department. The successful bidder will take up the option on the lot.
